

Mr. Yost,

I am writing because I have great concern over Joe Biden's reversal of the previous administration's executive order which prohibited "any acquisition, importation, transfer or installation of BPS electric equipment by any person or with respect to any property to which a foreign country or a nation thereof has any interest, that poses an undue risk to the BPS, the security or resiliency of U.S. critical infrastructure, or the U.S. economy, or U.S. national security or the security and safety of U.S. persons."

By allowing any foreign entity to influence our energy infrastructure this opens the door for foreign influence at any time to "turn off" or "regulate" our energy infrastructure that I am paying for. It's your job to protect me and my family and ALL Ohioans from foreign intrusion.

As a technical professional I understand how easily a foreign entity could have the ability to manipulate our power grid through the "Internet of Things".

I am watching your reaction closely on this matter. Should you do nothing you will be removed from office so fast your head will spin. Should you send a reply in a mealy-mouthed manner the same applies. I'm sick to death of officials not doing there job and protecting our country and our prosperity.

I fully expect a strong public response to this EO which is a gross and heinous attack on the sovereign United States.

Don't twiddle your thumbs on this matter. The entire state needs to know your intentions within the next 48 hours.

Kindest Regards,

T. Maras
