---

Available Balance is the most current picture of funds you have available for withdrawal. It reflects the latest balance based on transactions recorded to your account today including deposited funds, paid checks, withdrawals and point-of-sale purchases. It does not include any margin you may have on your brokerage account. (Please note that some transaction activity may not be immediately recorded to your account and will then not be reflected in the available balance. The first \$100 of ATM deposits will be included the same day in your available balance; the remaining funds will be added as items are processed and any holds are removed. Availability of branch deposits may vary; complete details on funds availability are reflected in our Funds Availability Policy.)

Note about deposits: Some funds may not be immediately available.
